UNORDINARY SOLUTIONS FOR UNORDINARY CHALLENGES

node101 provides low-latency, traceable, scalable, and regulation-compliant blockchain access to crypto asset platforms through its node and RPC infrastructure based in Istanbul, Paris and Dubai.

Battle-Tested Infrastructure

High uptime, low latency, and regulation compliancy; form a strong, competitive infra at the most optimal cost.

Enterprise RPC Services

Dedicated, shared, archive, testnet, and high-throughput RPC infrastructure.

7/24 Operations Support

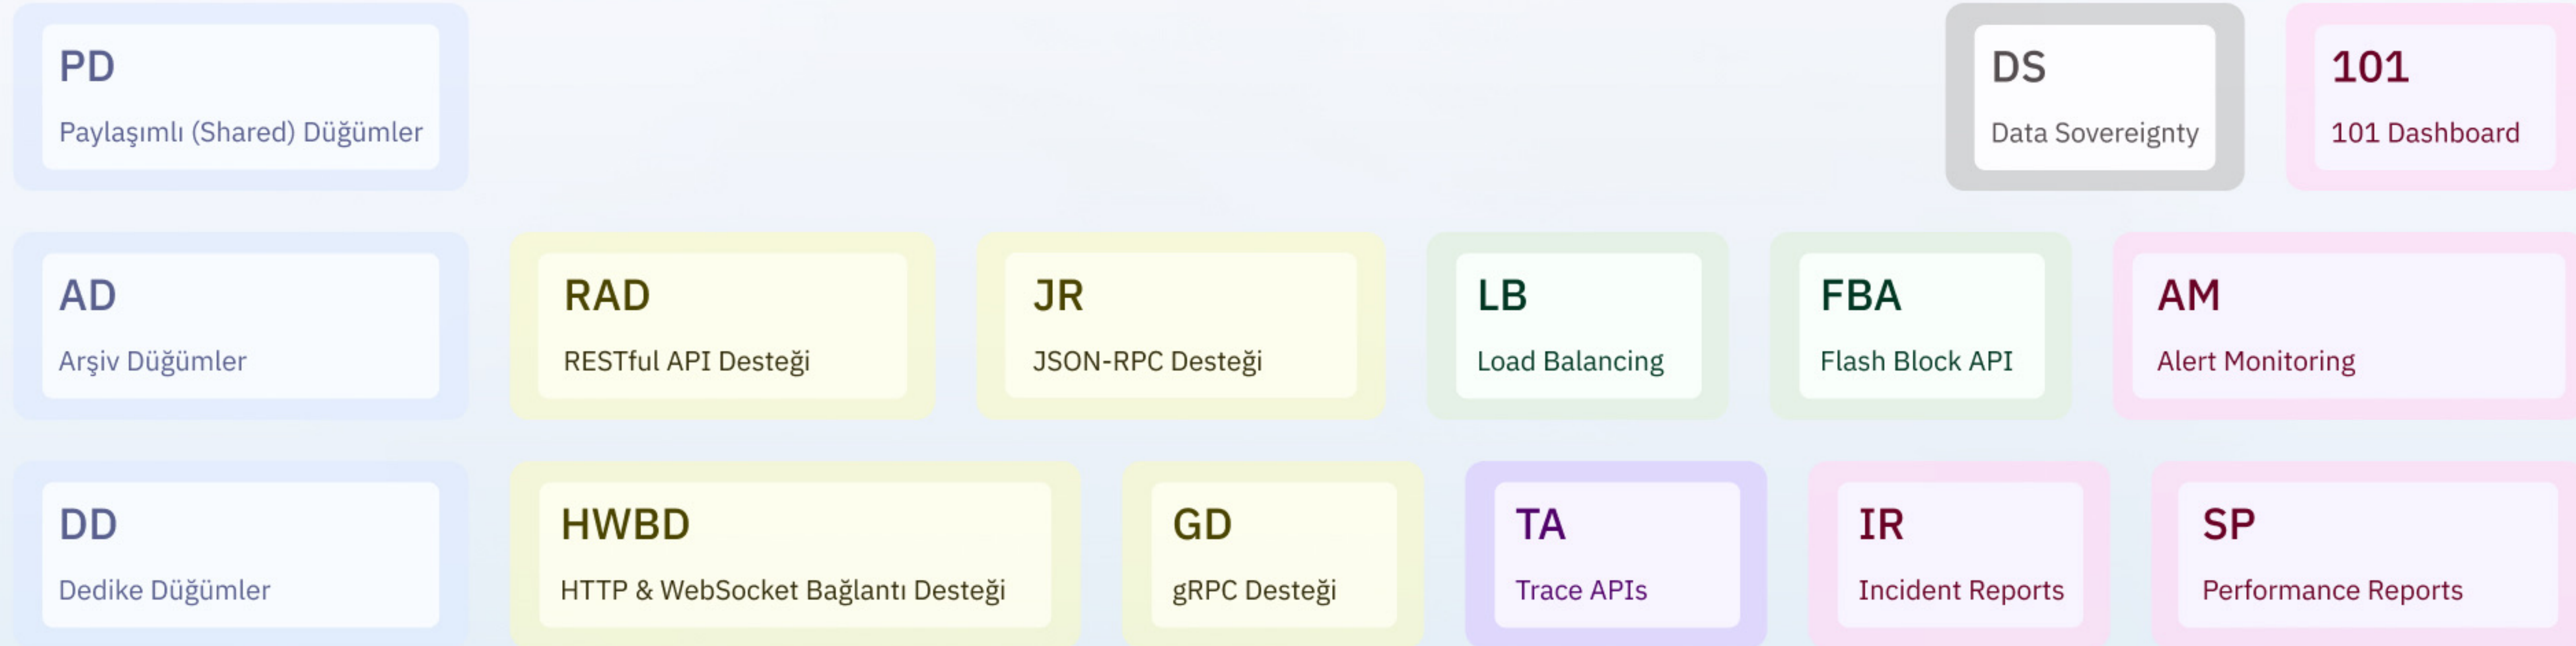

Monitoring, alerting, incident reporting, and technical support processes.

Compliance-Focused Architecture

Infrastructure designed in line with Turkish and UAE regulation expectations.

ALL SOLUTION YOU NEED THROUGHOUT YOUR SERVICE LIFECYCLE

UP TO 10X MORE AFFORDABLE THAN OTHERS

Compare the services of Alchemy, Chainstack, QuickNode, and others with node101 to see how you can save treasures for yourself. Start your 7-day trial now.

1000 rps - 1.000.000.000 RPC Responses

 node101	\$499 / month
 Dwellir	\$1900 / month
 Chainstack	\$5040 / month
 Quicknode	\$18599 / month
 Alchemy	\$33845 / month

* Estimates based on public pricing. Actual costs may vary in every provider.

DEDICATED RPC

Dedicated RPC provides reserved node infrastructure for institutions with high traffic, sensitive data, low-latency requirements, and custom performance needs.

READY WITHIN 48 HOURS

Your requested service is prepared for use within two business days

Incident Severity	Description	Initial Response Time
SEV 1 (Critical)	Complete node unavailability	< 2 Hours
SEV 2 (High)	Performance issue	< 5 Hours
SEV 3 (Medium)	Partial errors or performance degradation	< 10 Hours
SEV 4 (Low)	Information request or minor issue report	< 24 Hours

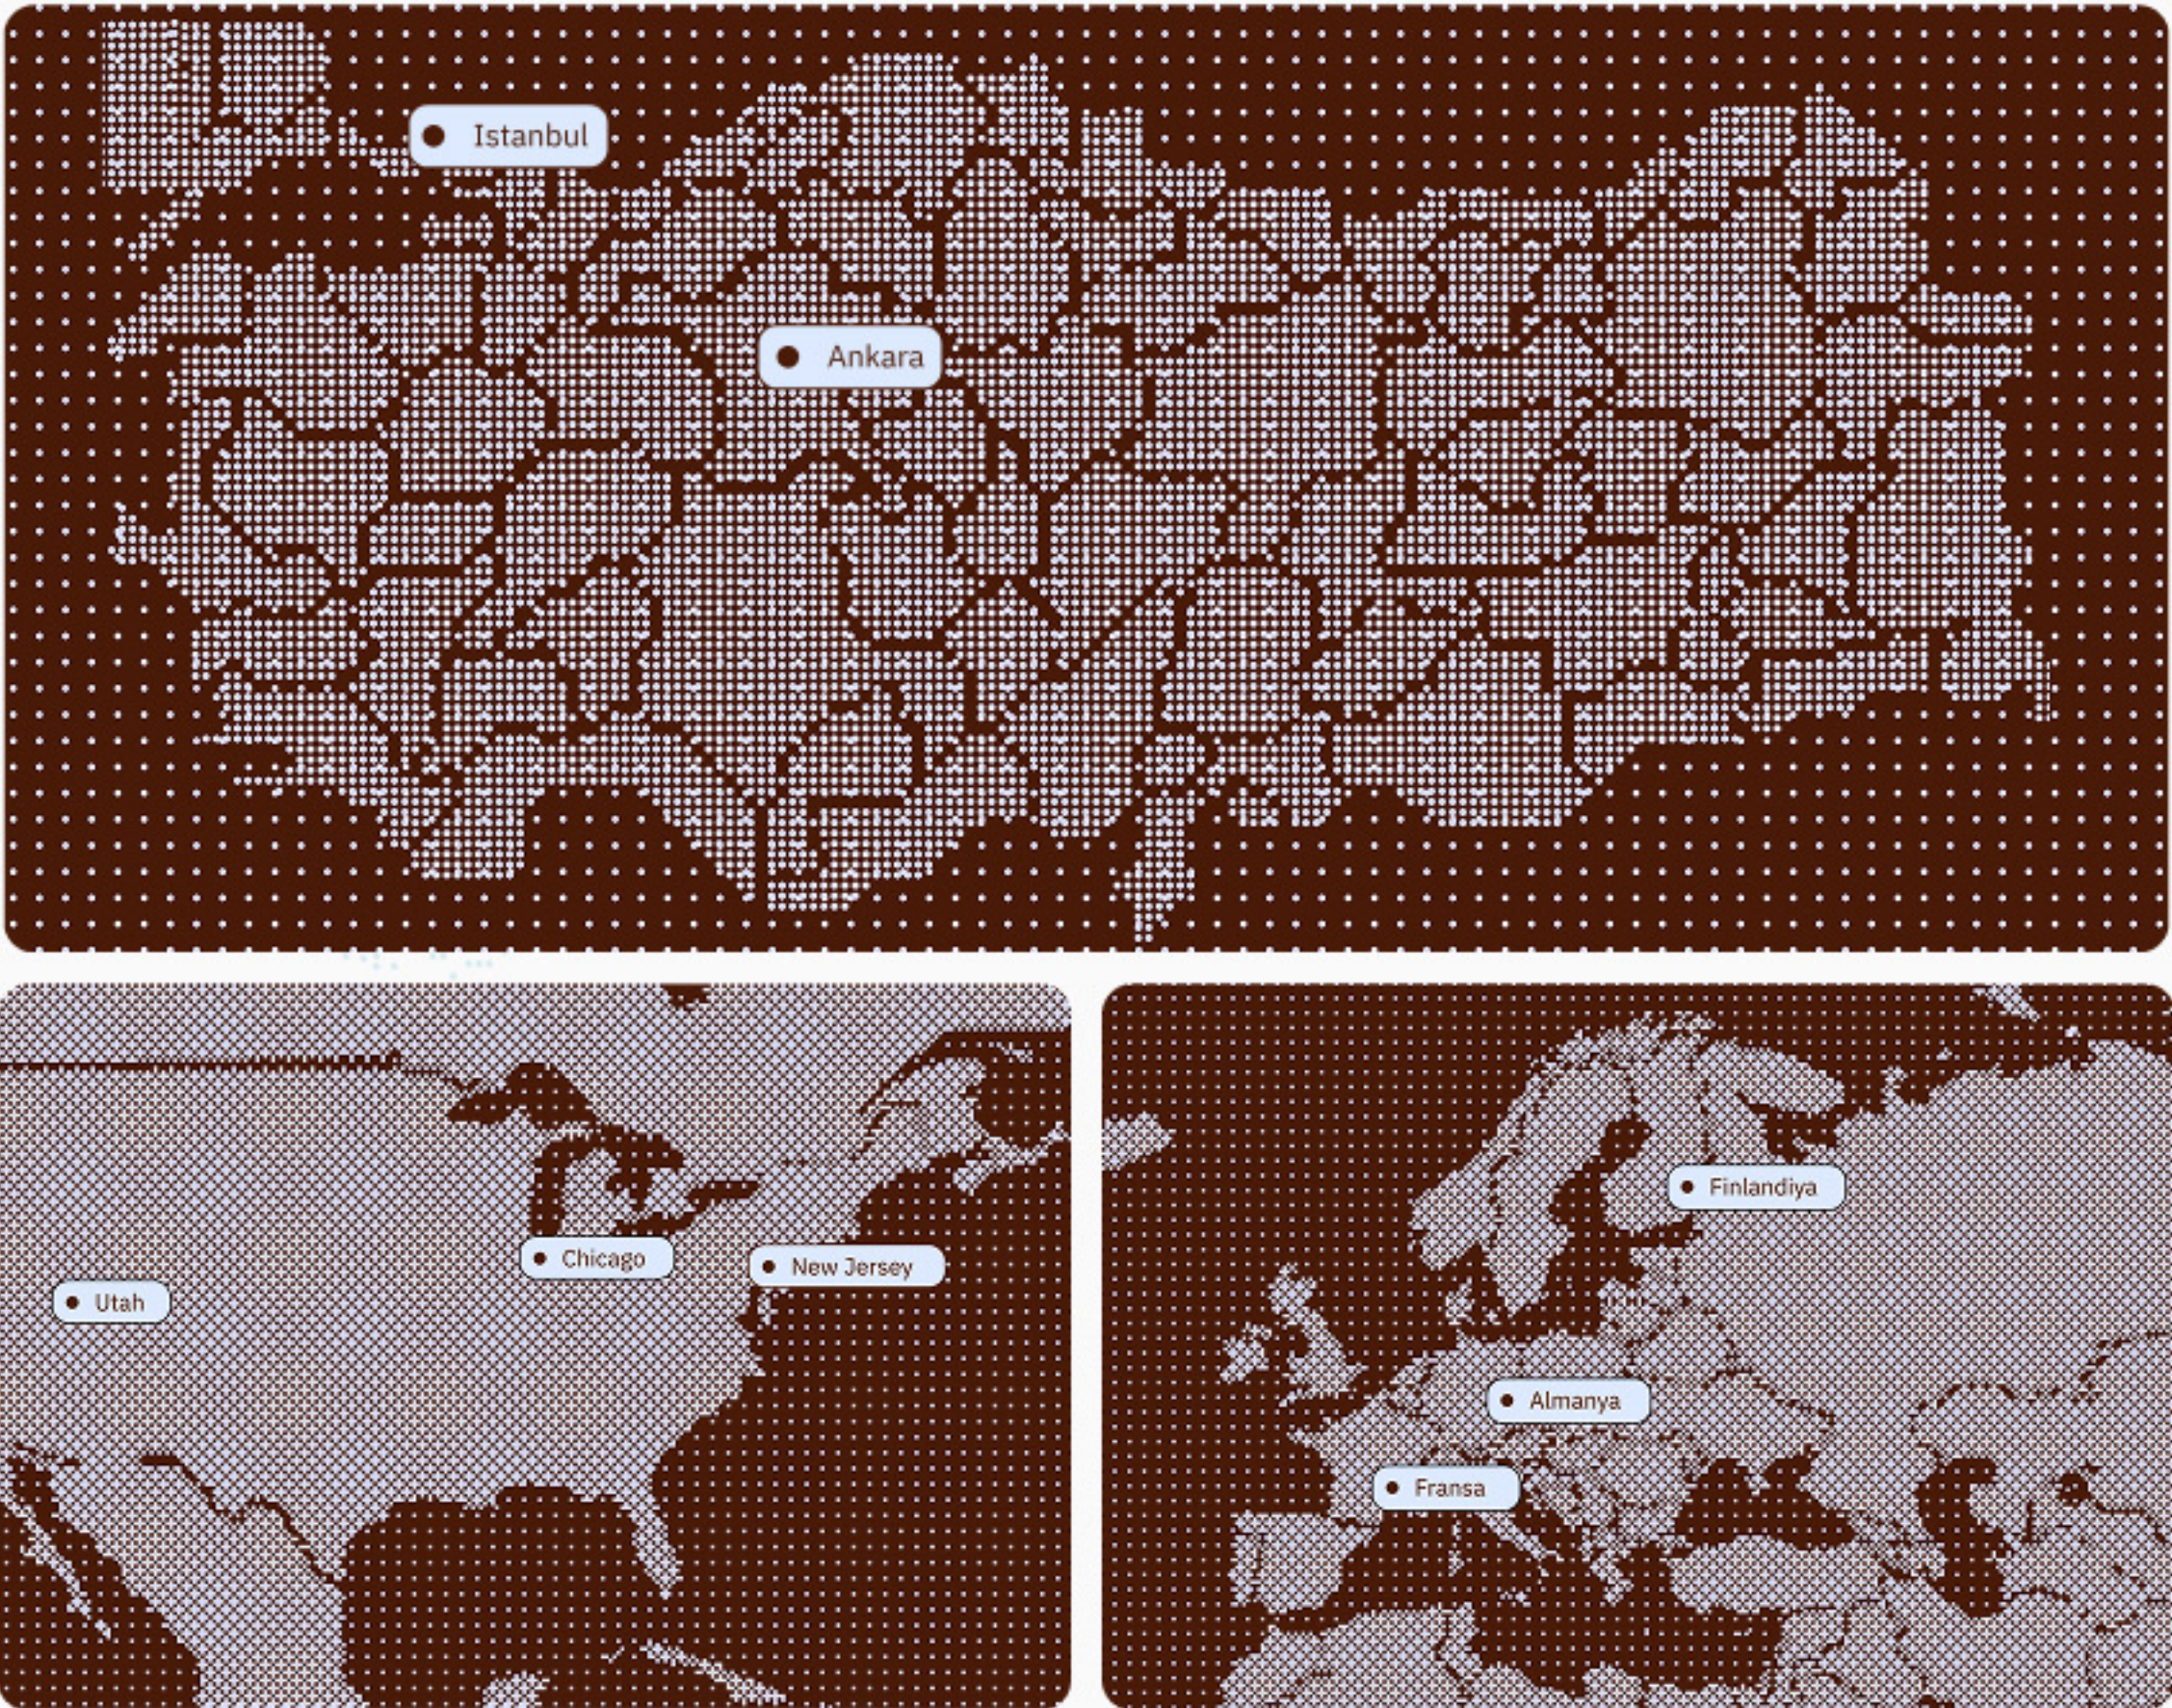

ZERO TRUST ARCHITECTURE

VLAN ISOLATION

Operations are performed only through isolated private networks accessible by authorized users.

GEOGRAPHIC REDUNDANCY

If our primary infrastructure in Türkiye cannot deliver the expected performance for any reason, our overseas infrastructure is activated.

MONITORING & REPORTING

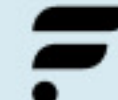

ROOT CAUSE ANALYSIS - RCA

A detailed technical report is provided within 48 hours after every critical incident, SEV 1 or SEV 2.
